

## On The Oshawa Waterfront

# What's All the Stink About?

Well, have you heard about the proposal to locate a heavy industrial, stinky, noisy ethanol distillery on Oshawa's precious waterfront, bang up against the Second Marsh and directly across the Harbour from Lakeview Park and the beach?

FarmTech Energy Corporation's own studies predict that the stink from their proposed plant is likely to engulf Lakeview Park; the Second Marsh, the Waterfront Trail, the Minacs head office, and all the surrounding area.

As for the noise, it'll be 24/7.

The plant would be a significant producer of green house gases and other pollutants; it would consume huge amounts of municipally supplied water when residents are being told not to water their lawns; and it would seriously undermine the City's plans for a clean, green, people friendly waterfront.

Let's not be sweet talked, misled, or coerced into permitting this heavy industrial blight on our waterfront.

Tell the City to **Just Say No** to the ethanol plant by filling out the information below and sending this flyer to:

**Thomas B. Hodgins,  
City Hall, 50 Centre St. S.,  
Oshawa, ON, L1H 3Z7**

I, the undersigned, would urge the City of Oshawa to JUST SAY NO to the application to allow the construction and operation of an ethanol distillery/plant at Oshawa's waterfront.
